

# The Elan Factory – Product Data Sheet

Valves for Turbo Esprit, Excel, Eclat, Elite & normally aspirated Esprit

Are you looking for a source of high quality stainless steel valves for your Turbo Esprit? Then we can help you with a range of standard and oversize valves.

We offer a range of quality stainless steel valves in EN214N and prices start from \$25-00 each plus GST. These are available in standard and oversizes. Oversize valves take full advantage of the existing valve seat and increase breathing capability. Some oversize inlet valves are available with a specially developed high-flow profile on the back of the head to further increase breathing efficiency.

Replacement valves are available for the following vehicles and the relevant part numbers:

- |   |                 |               |
|---|-----------------|---------------|
| a) Elite, Eclat, Esprit, Jensen Healey  | B907E0019F      | inlet valve   |
| b) Elite, Eclat, Esprit, Jensen Healey  | A907E0020F      | exhaust valve |
