## Ford/Lotus Elan reverse light switch

The original gearbox reverse light switch (Lotus part number A036M6304Z and Lucas part number 35745/2273D) has been obsolete for many years. This situation leaves owners with Ford/Lotus gearboxes with few choices as to what to fit as a suitable replacement. This same switch was fitted into several installations including the 2000E four-speed gearbox, as standard equipment in the Lotus Elan and Lotus Elan +2. It was also fitted into the five-speed gearbox as standard equipment in the Lotus Elan +2 130/5 and the later Lotus Elite/Eclat.

After some resourceful engineering, The Elan Factory is pleased to offer this remanufactured component as a direct replacement part.

- Weight - 25 grams
- Overall length – 43mm
- Main body material - Brass
- Main body length – 32mm
- Threaded section – 3/8 UNF x 21mm
- Plunger length – 5mm
- Plunger movement – 2.5mm
- Electrical wiring – 170mm long including bullet connectors

Installation is straightforward, as no modifications are required. The switch should be installed per the workshop manual and the necessary adjustments made so the switch operates correctly when reverse gear is selected.
