## Lotus Excel Decal Kits

These decals have been manufactured as a cost effective replacement for the discerning Lotus owner.

A leading Australian manufacturer has been selected to produce these decals using state of the art technology.

Their comments and endorsements are as follows:

“These faithful reproductions of the original fitment Lotus decals have been created using the latest scanning and digitising technology. This in conjunction with computer drawn vector artwork delivers a finished product that is produced to a tighter tolerance than was possible when the original decals were created. This results in a more professional visual integrity due to even outlines and consistent detail thickness.

Our decals are produced from top quality, brand name cast vinyl. These are chosen for their excellent adhesive qualities and suitability to outdoor automotive use. Guaranteed 5-7 years in Australia’s harsh environment, 7-9 years on the European continent.”

- Faithful reproduction of the original decals
- Ease of installation with integral alignment marks
- Top quality vinyl materials from 3M
- Superior adhesives to eliminate peeling
- Guaranteed to withstand high levels of UV radiation and all other conditions
- Choice of colours to match your existing decals. The standard colour schemes available are as follows: White, Grey & White

These decals are supplied as a complete kit and are ready for immediate installation. All traces of the old decals should be removed. The paintwork and surrounding surface should be clean, dry and free of any dust or dirt. If the surface area requires cleaning prior to application of the decals, then the area must be cleaned with warm soapy water and then dried.
